

INTERNATIONAL AERODROME CERTIFIED EMPLOYEE (IACE) TRAINING

Targeted, personalized training for airport operations personnel is critical to achieving the highest levels of aviation safety. Airports that demonstrate a well-trained workforce are more attractive to new airline partners and passengers. With that in mind, IAAE, with the support of Corporación Quiport, has developed the International Aerodrome Certified Employee (IACE), a 7.5 hour, online training course based on ICAO standards.

TRAINING TOPICS

Requirements for Aerodrome Operations, the Standards and Recommended Practices under ICAO Annex 14, with emphasis on key operations and safety issues, including:

- Safety Management Systems
- Aerodrome Key Elements
- Airfield Physical Characteristics
- Aerodrome Operations and Maintenance
- Obstructions
- Environmental Issues Related to Aerodrome Operations
- Visual Aids for Navigation
- Security Issues Related to Airport Operations
- Emergency Planning; Emerging Issues in Aerodrome Operations

BENEFITS

The IACE designation provides a number of benefits to aerodrome operations personnel and officials, including:

- The latest information available from ICAO Annex 14 and related documents.
- A thorough education designed to enhance your knowledge and skills in the aerodrome arena.
- Increased promotion and career opportunities in the aviation field.
- A prestigious international designation acknowledging you as part of an elite group of aviation professionals.
- Course developers who are internationally recognized aviation professionals with extensive experience and knowledge.

WHO

should earn their IACE?

- Airport operations directors, chiefs, managers, supervisors, officers, coordinators and related staff
- Airport construction, maintenance and engineering directors, chiefs, supervisors, inspectors, managers, technicians and related staff
- Airport emergency personnel at all levels
- Airport safety and security personnel at all levels
- Airline and civil aviation authority officials
- Airport managers and directors also will find the course very useful, as it will allow them to understand the requirements of safe airfield operations at their airports.
