

# ACT's Collaborative Foundation for Innovation

## What Is Required for a Successful ACT Workstream?

**Innovative Concepts** – ACT invites industry partners to present bold ideas, emerging technologies, and new concepts that inspire airports and generate fresh insights to drive innovation.

**Industry Partners** – Active engagement from industry partners is essential to ACT's mission. Partners contribute resources, expertise, and strategic collaboration to advance shared industry goals.

**Airport Support** – ACT partners with airports to capture local priorities and generate insights that inform a broader national perspective. Participating airports also host pilot projects, creating real-world opportunities to test and evaluate new concepts.

**Defined Vision** – A clear strategy from the outset ensures the workstream remains deliverable-driven, with a focus on producing a tangible outcome such as a white paper, guidebook, or deployed technology.
