Executive AI Workshop: What Airport Executives Need to Know Now

Organized by IAAE and Presented in Partnership with Aviation Strategies International (ASI)

Room: Liben 3

The greatest barrier to AI in aviation isn't the technology. It's leadership.

Kick off the conference with an exclusive, high-impact workshop designed specifically for airport leaders, board members, and senior aviation executives.

While the industry fixates on the capabilities of Artificial Intelligence, the true differentiator for future-ready airports isn't the technology itself, it is the leadership, governance, and culture behind it.

This interactive session will focus on how airports can successfully prepare for AI adoption through strong leadership, workforce transformation, governance, and strategic planning — beyond the technology itself.

Through expert insights and collaborative discussions, participants will explore practical approaches to building AI-ready airport organizations and preparing teams for the future of aviation.

Topics Include:

- *Why AI initiatives succeed or fail*
- *Building an AI-ready airport culture including workforce reskilling and leadership strategies*

- *Holistic incorporation of AI throughout the organization's strategies, operations and management processes*
- *Governance, regulatory issues, and implementation planning*
- *Practical AI roadmap strategies for airports*

The workshop will conclude with key insights and recommendations shared in a post-session executive summary paper. Participants will receive an Executive Workshop Certificate.

The Transatlantic Aviation Outlook: Growth, Risk, and Strategic Opportunity

A high-level strategic outlook on the future of transatlantic aviation, examining how geopolitical dynamics, economic uncertainty, and evolving airline strategies are reshaping connectivity between Europe and North America. The keynote will explore the implications for hub competitiveness, infrastructure investment, and long-term growth.

Speaker:

Rafael Schwartzman
Regional Vice President Europe
(IATA)

10:10-11a.m.

SESSION 1 — Opening Leadership Dialogue & Vision 2035: Strategic

Leadership for Airports – *A forward-looking session for airport CEOs, examining how leaders can navigate disruption and shape the future of aviation. Panelists will discuss strategic decision-making, long-term airport planning, investment priorities, and organizational transformation. The dialogue will also touch on Europe–North America connectivity, airline partnerships, workforce development, and emerging technologies such as AI and digital transformation — providing actionable takeaways for guiding airports through uncertainty and positioning them for sustainable growth.*

SESSION 4 — Geopolitics, Airspace & Network Realignment

This session explores how global geopolitical developments are impacting airspace management, airline networks, and airport operations. Topics include the Ukraine war, Middle East route shifts, NATO corridor effects, transatlantic joint ventures, and strategies for risk diversification across European and North American hubs. Panelists will focus on the operational and network implications for airlines and airports, including airspace efficiency, connectivity planning, and collaboration between carriers and airport operators. The discussion will remain professional and industry-focused, highlighting strategies to maintain resilience, optimize networks, and ensure safe and efficient aviation operations.

SESSION 6—The Intelligent Airport Ecosystem: AI, Automation and Smart Infrastructure- / AI-Driven Airport Operations: From Data to Decisions -

Airports are evolving rapidly through AI-driven operations, automation, smart terminals, IoT-enabled infrastructure, and predictive maintenance. This session explores how these technologies enable smarter, faster, and more efficient decision-making across the airport ecosystem. Panelists will share lessons from real-world implementations, highlighting how airports can improve efficiency, enhance infrastructure resilience, optimize passenger experience, and build intelligent, future-ready operations. Strategic considerations will include digital transformation, investment priorities, public-private partnerships, and scaling innovation — providing a comprehensive view of how airports are preparing for the future.

SESSION 7- Advanced Air Mobility & Vertiports: Defining the Airport Role-

Advanced Air Mobility (AAM) is moving rapidly from concept to reality, creating exciting opportunities and challenges for airports. This session examines how eVTOL aircraft, vertiports, and new airspace management systems can integrate into the existing aviation ecosystem. Panelists—including emerging operators and infrastructure leaders—will share real-world insights on early deployments, operational challenges, and collaboration with airports. The discussion will also explore infrastructure requirements, regulatory frameworks in Europe and North America, and the commercial realities of scaling AAM, while assessing its potential impact on airport capacity, connectivity, and the passenger journey.

SESSION 9— Financing the Future: Airport Investment, Capital Strategy & Infrastructure Delivery-

As airports face growing demand alongside significant infrastructure constraints, the ability to finance and deliver expansion has become a defining competitive advantage. This session examines how airports are accessing capital, structuring investment, and delivering large-scale infrastructure programs in an increasingly complex financial environment. Panelists will explore evolving funding models, including public-private partnerships, privatization trends, and institutional investment, as well as the role of capital markets in supporting long-term growth. The discussion will focus on how airports can align financial strategy with capacity development to remain competitive in a capital-intensive industry.
