Dec 16-17, 2025 ✈️ Riyadh, Saudi Arabia

12-1pm

Session 2: Attracting the Next Generation – AI and Workforce Innovation

This session will explore the challenges the aviation industry faces in attracting future leaders and younger generations to pursue careers in aviation. With aviation programs struggling to appeal to high school students, panelists will discuss strategies to make the industry more attractive. Topics will include the role of regulators, airlines, airports, and universities in promoting aviation careers, successful workforce development initiatives, and international best practices that can be adapted across regions. Additionally, the session will examine how AI and emerging technologies can support workforce innovation and skills development.

Moderator:

Bader Al Aydi
Chairman, Aviation Department
Prince Sultan University

Speakers:

Julius Norkunas
CEO, Aeroclass.org

Captain Ismail Koshi
CEO
Saudi Academy

Moayed Al Suwaid
VP Human Capital
King Salman International Airport

Mohammed Alhoti
Vice President, Human Capital
The Helicopter Company

Asaad AlJomoai (invited)
President
Boeing Saudi Arabia

1- 2 pm.

Session 3: Launchpads of the Future - Advancing Spaceports and Security Innovation

- This session will juxtapose the future of spaceport development, its potential impact on new airport development, global transportation and commerce with emerging technologies in airport security and operations, highlighting crossover benefits and regulatory issues.

Sponsored by

Moderator:

GLOBAL AVIATION ISSUES CONFERENCE

Join us at the annual **Global Aviation Issues Conference, December 16-17, 2025, in Riyadh, KSA**, where we will delve into the future of aviation and tackle crucial topics ranging from emerging technologies and air cargo to security and workforce issues.

- Engage with experts and thought leaders who are at the forefront of innovation and change in the aviation sector.
- Explore the pivotal role of international cooperation in promoting industry growth.
- Delve into the importance of air cargo in powering global trade and supply chain management.
- Learn how digital transformation, AI, and big data are reshaping aircraft maintenance, operations, and passenger experiences.
- Gain insights into the evolving landscape of aviation security.
- Discuss strategies for building a skilled aviation workforce and promoting diversity within the industry.
- Explore sustainability initiatives aimed at reducing the environmental footprint of aviation; and much more!
